

MM

Carburized & Hardened Miter Gears

Module 2 ~ 5

Specifications	
Precision grade	JIS B 1704 grade 4
Gear teeth	Gleason
Pressure angle	20°
Material	SCM415
Heat treatment	Carburizing
Tooth hardness	55 ~ 60HRC

B3

[Caution on Product Characteristics]

- The allowable torques shown in the table are the calculated values according to the assumed usage conditions. Please see page 421 for more details.
- Dimensions of the outside diameter, the overall length and crown to back length are all theoretical values, and some differences will occur due to the corner chamfering of the gear tips.

LM

Sintered Metal Miter Gears

Module 0.8 ~ 1.5

Specifications	
Precision grade	JIS B 1704 grade 5
Gear teeth	Gleason
Pressure angle	20°
Material	SMF5040
Heat treatment	—
Tooth hardness	70 ~ 95HRB

B1

Catalog No.	Gear ratio	Module	No. of teeth	Shape	Bore	Hub dia.	Pitch dia.	Outside dia.	Mounting distance	Total length	Crown to back length	Hub width

LM1.5-20		m1.5	20	B1	6	26	30	32.12	30	21	16.06	9

[Caution on Product Characteristics]

- The allowable torques shown in the table are the calculated values according to the assumed usage conditions. Please see page 421 for more details.
- Steam treatment (an effect creating surface oxidation) provides rust prevention; however, it is not a complete solution.
- Although the sintering process allows for the inclusion of oil to maintain lubrication, these gears have not been oil impregnated.

[Caution on Secondary Operations]

- ① Please read "Caution on Performing Secondary Operations" (Page 422) when performing modification and/or secondary operations for safety concerns. Haguruma Kobo, the KHK's system for quick modification of KHK stock gears is also available.
- ② In the illustration, the area surrounded with --- line is masked during the carburization process and can be modified. However, care should be exercised since the hardness is high (approx. HRC40, maximum).
